THE MAN

Andrew Yang is a family man and entrepreneur who sees that automation and artificial intelligence (AI) are going to radically change employment opportunities. His first hand knowledge of running businesses and the power of technology positions him to lead us through this great transition in a smooth and prosperous way. To address the impact of automation, he plans to implement **"The Freedom Dividend"** which gives \$1000/month to every citizen over the age of 18, to establish a minimum basic income for all Americans.

As a society, we can't hide from the future; we have to build and own it.
