

HUMANITY FIRST.

My name is Andrew Yang.

I'm running for President because automation has already eliminated more than 4 million American jobs and we are about to automate away tens of millions more. More than a third of all American workers are at risk. For this transition, what we need is:

-The Freedom Dividend-

A universal basic income of \$1,000/month, that's \$12,000/year, for every American over the age of 18, independent of one's work status or any other factor.

This plan would enable all Americans to pay their bills, educate themselves, start businesses, be more creative, stay healthy, relocate for work, spend time with their children, take care of loved ones, and have a real stake in the future.

I am not a career politician as much as I am a citizen, a parent, and a patriot who decided we need to have a different approach to solving problems. If you want to join us in rewriting the rules of the 21st century economy, go to: **Yang2020.com**
