

# I'm Andrew Yang

**I'm running for President as a Democrat in 2020 because I fear for the future of our country.** New technologies – robots, software, artificial intelligence – have already destroyed more than 4 million US jobs, and in the next 5-10 years, they will eliminate millions more. **A third of all American workers are at risk of permanent unemployment.** And this time, the jobs will not come back.

**I'm not a career politician—I'm an entrepreneur who understands the economy.** It's clear to me, and to many of the nation's best job creators, that we need to make an unprecedented change, and we need to make it now. But the establishment isn't willing to take the necessary bold steps. As president, my first priority will be to implement **Universal Basic Income for all Americans over the age of 18: \$1,000 a month, no strings attached** paid for by a new tax on the companies benefiting most from automation. UBI is just the beginning. A crisis is underway—we have to work together to stop it, or risk losing the heart of our country. The stakes have never been higher.

## FLOWING EVERY MONTH INTO IOWA COMMUNITIES:

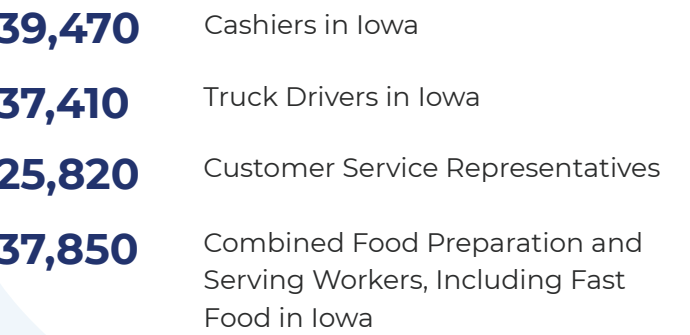

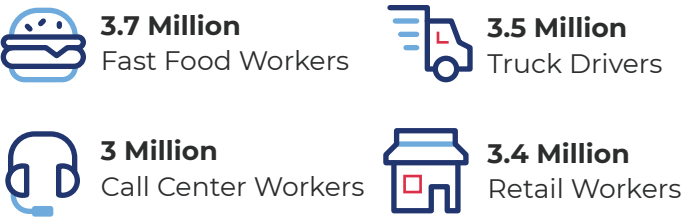

|  |  |  |
|--|--|--|
| <b>\$79 MILLION /MO</b><br>Davenport, IA | <b>\$18 MILLION /MO</b><br>Muscatine, IA | <b>\$8 MILLION /MO</b><br>Storm Lake, IA |
| <b>\$2 MILLION /MO</b><br>Bloomfield, IA | <b>\$6 MILLION /MO</b><br>Decorah, IA    | <b>\$9 MILLION /MO</b><br>Spencer, IA    |

**OVER 130 POLICIES THAT WILL TRANSFORM IOWA COMMUNITIES.**

## FREEDOM DIVIDEND

We are in the midst of what experts call the **4th industrial revolution**. Automation threatens a third of all jobs.

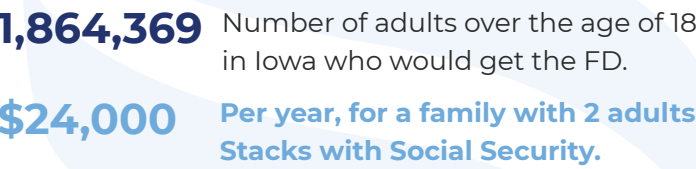

### JOBS CURRENTLY BEING AUTOMATED OR AT RISK OF AUTOMATION IN US:

| <b>1,000 Economists endorsed UBI in 1968</b>                   |   |

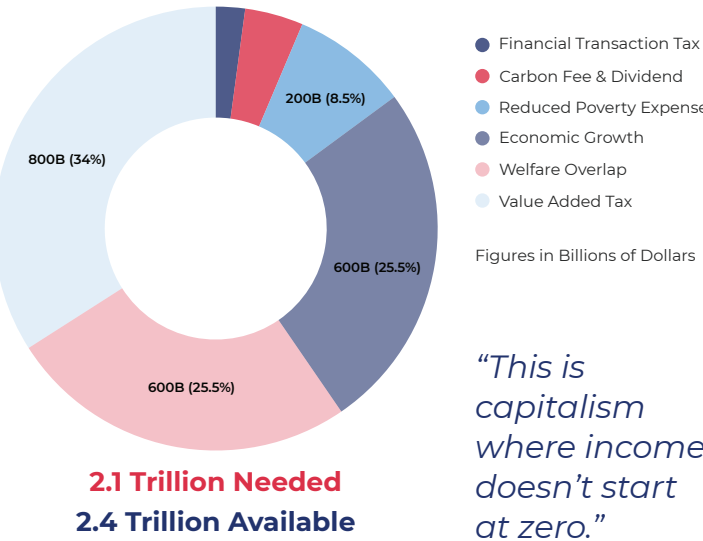

## MEDICARE FOR ALL

**Healthcare should be a basic right for all Americans.** Right now, if you get sick you have two things to worry about – how to get better and how to pay for it. Too many Americans are making terrible, impossible choices between paying for healthcare and other needs. We need to provide high-quality healthcare to all Americans and a Medicare for All system is the most efficient way to accomplish that.

### As President, I will:

- ✓ Control the cost of life-saving prescription drugs, through negotiating drug prices.
- ✓ Create efficiencies and reduce waste by utilizing modernized services like telehealth and assistive technology, supported by measures such as multi-state licensing laws.
- ✓ Change the incentive structure by offering flexibility to providers, prioritizing patients over paperwork, and increasing the supply of practitioners.
- ✓ Shift our focus and educating ourselves in preventative care and end-of-life care options.
- ✓ Diminish the influence of lobbyists and special interests in the healthcare industry that makes it nearly impossible to draft and pass meaningful healthcare reform.
- ✓ Ensure crucial aspects of wellbeing, including mental health, care for people with disabilities, HIV/AIDs detection and treatment, reproductive health, maternal care, dental, and vision are addressed and integrated into comprehensive care for the 21st century.

### How we will pay for the Freedom Dividend without causing inflation:

## HUMAN CAPITALISM

**The market should serve humanity—not the other way around.** While capitalism has led to unparalleled success and innovation, the overemphasis on profits has been harmful to the vast majority of Americans.

We need to move to a new form of capitalism, Human Capitalism, that's geared towards maximizing human well-being and fulfillment.

It's time to change the way we measure the economy, moving away from GDP and corporate profits to human-centered measurements like median income, standard of living, job satisfaction, childhood success, life expectancy, and mental health.

## HOW SHOULD WE MEASURE SUCCESS?

The concept of GDP was first developed by Simon Kuznets in 1934. Kuznets warned against GDP as a metric for national well-being.

We need a new set of measurements that take into consideration human well-being.
