

"Women do more of the **unrecognized** and **uncompensated** work in our society. That will not change, unless we change it."

"This is a revolution of humanity, a revolution of reason."

I urge you to join me. No one else is going to build a better world for us. We're going to have to do it ourselves. Together.

WHY RUN FOR PRESIDENT?

"I don't have an innate desire to run for President. I have two boys. One of them is autistic. I see the future we are leaving for them and it is not a future I can accept."

A PATH TO VICTORY

Over 10% of Trump supporters say they would vote for Andrew Yang if he's the Democratic nominee. Yang is activating thousands of independents, libertarians, conservatives as well as democrats and progressives.

If Andrew Yang is the nominee...
HE WINS THE WHOLE THING. THAT'S MATH!

MADE BY SUPPORTER OF ANDREW YANG. NO OFFICIAL AFFILIATION

I'm Andrew Yang

I'm running for President as a Democrat in 2020 because I fear for the future of our country. New technologies – robots, software, artificial intelligence – have already destroyed more than 4 million US jobs, and in the next 5-10 years, they will eliminate millions more. **A third of all American workers are at risk of permanent unemployment.** And this time, the jobs will not come back.

I'm not a career politician—I'm an entrepreneur who understands the economy. It's clear to me, and to many of the nation's best job creators, that we need to make an unprecedented change, and we need to make it now. But the establishment isn't willing to take the necessary bold steps. As president, my first priority will be to implement **Universal Basic Income for all Americans over the age of 18: \$1,000 a month, no strings attached**, paid for by a new tax on the companies benefiting most from automation. UBI is just the beginning. A crisis is underway—we have to work together to stop it, or risk losing the heart of our country. The stakes have never been higher.

132 POLICIES TO TRANSFORM AMERICA
Yang2020.com

FREEDOM DIVIDEND

We are in the midst of what experts call the **4th industrial revolution**. Automation threatens a third of all jobs.

JOBS CURRENTLY BEING AUTOMATED OR AT RISK OF AUTOMATION:

We need to implement the Freedom Dividend, a universal basic income of \$1,000 a month for every American adult over the age of 18. This would enable all Americans to pay their bills, pursue education, start businesses, stay healthy, relocate for work, spend time with their children, take care of loved ones, and have a real stake in the future. The Freedom Dividend would permanently grow the economy by 13 percent—or about \$2.5 Trillion by 2025—and would increase the labor force by 4.5 million people. Putting money into people's hands and keeping it there would be a perpetual boost and support to job growth and the economy.

MEDICARE FOR ALL

Healthcare should be a basic right for all Americans. We need to provide high-quality healthcare to all Americans and a single-payer system is the most efficient way to accomplish that.

America is one of the few industrialized nations that does not provide healthcare for all of its citizens. Instead, we have a private healthcare system that leaves millions uninsured and leads to hundreds of thousands of bankruptcies every year. At the same time, our cost of care is higher than in almost any other industrialized country while providing worse outcomes. Our employer-based system also makes it hard to start new businesses or hire new employees. And those who work in the gig economy, or as part-time or contract workers, are left out.

As President, I will work with Congress to create a Medicare For All program to provide healthcare to all Americans. We can control costs while providing universal coverage, moving from the worst to the best of both worlds.

How we will pay for the Freedom Dividend without causing inflation:

2.1 Trillion Needed
2.4 Trillion Available

"This is capitalism where income doesn't start at zero."

HUMAN CAPITALISM

The market should serve humanity—not the other way around. While capitalism has led to unparalleled success and innovation, the overemphasis on profits has been harmful to the vast majority of Americans.

We need to move to a new form of capitalism, Human Capitalism, that's geared towards maximizing human well-being and fulfillment. It's time to change the way we measure the economy, moving away from GDP and corporate profits to human-centered measurements like median income, standard of living, job satisfaction, childhood success, life expectancy, and mental health.

HOW SHOULD WE MEASURE SUCCESS? PEOPLE

PRODUCT

The concept of GDP was first developed by Simon Kuznets in 1934. Kuznets warned against GDP as a metric for national well-being.

- Quality of Life / Life Expectancy
- National Optimism
- Mental Health and Happiness
- Civic Engagement
- Volunteerism
- Economic Mobility / Dynamism
- Access to Education
- Marriage / Divorce Rate
- Consumer / Student Debt
- Infrastructure
- Underemployment
- Income Inequality
- Infant Mortality
- Substance Abuse Deaths

We need a new set of measurements that take into consideration human well-being.
