

Andrew Yang for President

YouTube Andrew Yang

I am running for president because we have automated away 4 million U.S. jobs and in the next 5-10 years will eliminate millions more (jobs in call centers, truck driving, food preparation, etc.)

**It is not left,
it is not right,**

it is forward.

**And that is where
I'll take the country
in 2020.**

A handwritten signature of Andrew Yang in blue ink.

Have you Noticed?

- Amazon closing stores and malls, paying \$0 in taxes
- Loss of jobs from technology and automation
- 7 out of 10 Americans are living paycheck to paycheck
- Life expectancy has declined for the past three years in a row, which has never happened in any other developed countries

Solutions:

- Universal Basic Income(UBI). \$1,000/month for every adult
- Pay for UBI by taxing technology (Amazon, Google, Facebook, etc.)

You are a shareholder in the richest nation in the history of the world. You deserve the **Freedom Dividend** \$1,000/month

We need immediate solutions for the 21st century challenge. That's why I am advocating for the **Freedom Dividend**: \$1,000 a month for all American adults, paid for by a value-added tax that would harness the gains from automation or technology.

End corporate tax avoidance and tax loopholes with a 10% value-added tax. A VAT at half the European level could pay for UBI.
